Abstract: Chapter 6: Results of the researches on the animal-plant interaction: Food-plants of the Lepidoptera (FL), [in] Koçak,A.Ö. & M.Kemal, Results of the International Projects of the CESA on the Lepidoptera of the World-I. *Cent. ent. Stud., Memoirs* 3-4: 1589-1644, Pls. 21-35.

In this study, foodplants of the larva of the Lepidoptera based upon the Databank of the Cesa are listed alphabetically according to the Lepidopteran families and species. Information hitherto recorded for 4211 Lepidopteran species are given. Illustrations based upon the archives of the Cesa are obtained by the second author during the expeditions mainly to North Thailand in abroad, and various provinces of Turkey.

Abstract: Chapter 7. Illustrated list of the Lepidoptera recorded in the Transvaal (South Africa), [in] Koçak,A.Ö. & M.Kemal, Results of the International Projects of the CESA on the Lepidoptera of the World- I. *Cent. ent. Stud., Memoirs* 3-4: 1645-1684, Pls. In this chapter, the first results of the Project, Lepidoptera of South Africa are partly submitted. Totally 2568 taxa, which belong to 2125 species are listed alphabetically under the related families and together with their synonyms. Some original images, taken by the authors during the expeditions to Soutpansberg Mountains of the Cesa in 2004 and 2005 are also added.

During the studies on the Project of Lepidoptera of South Africa (LZA), we compiled the published information on the Lepidoptera of Transvaal. This survey is still continuing. As an intermediate results, the following list of the species group taxa are arranged alphabetically under the related families. Totally 2568 taxa, belonging to 2125 species, are given below with their synonyms. Illustrations are presented here as some examples, which indicate some results of recent field studies in northern Transvaal, Soutpansbergs Mountains, carried out by the authors in 2004 and 2005 under the organisation of the Cesa.

Northern territory of South Africa is actually divided into three different provinces, namely, Gauteng, Mpupalanga, and Limpopo. The present survey on the Lepidoptera fauna is based upon the classical name, Transvaal, covering all of the three modern provinces mentioned above.
